**CHENGDU, CHINA**

1-3 July 2025

1-3 七月 2025

**DAY 1**

An aerial photograph of a modern city skyline, likely Chengdu, China. The image shows a dense cluster of skyscrapers and modern buildings, with a large green park and a lake in the foreground. The sky is blue with some clouds. The image is framed by a dark blue diagonal shape on the left and a yellow diagonal shape on the right.

URBAN  
SH/FT

**Welcome!**

欢迎光临！

# DAY 1 - Agenda / 第一天 - 议程

| TIME                     | SESSION TITLE   | DESCRIPTION   |
|--------------------------|---|---|
| 13:00-13:30<br>(30 mins) | Welcome & Participant Introductions   | <ul style="list-style-type: none"> <li>Welcome to the Urban Biodiversity training</li> <li>Meet the trainers</li> <li>Establish common expectations for the training</li> <li>Participant introductions (prompt for participants: what does urban biodiversity mean to you?)</li> </ul>   |
| 13:30-14:00<br>(30 mins) | Presentation: What is Urban Biodiversity? Why Does it Matter for Cities?            | <ul style="list-style-type: none"> <li>Introduction to the UrbanShift Urban Biodiversity online course</li> <li>Familiarize participants with the concept of urban biodiversity and why cities should prioritize biodiversity considerations [10 mins]</li> <li>The imperative and opportunity for cities to contribute to national level biodiversity goals through the UN Convention on Biological Diversity and the Global Biodiversity Framework [15 mins]</li> <li>Q&amp;A [5 mins]</li> </ul>   |
| 14:00-15:15<br>(75 mins) | How to Develop a Data Driven Urban Biodiversity Strategy                            | <ul style="list-style-type: none"> <li>Introduction to six requirements for cities to develop a biodiversity strategy [60 mins] <ul style="list-style-type: none"> <li>Goals and Indicators</li> <li>Data Sources</li> <li>Data collection (including the importance of community participation and citizen science)</li> <li>Data Analysis</li> <li>Data Actionability</li> <li>Data Governance</li> </ul> </li> <li>Q&amp;A [15 mins]</li> </ul>  |
| 15:15-15:30<br>(15 mins) |   | TEA BREAK   |
| 15:30-16:00<br>(30 mins) | City Spotlights: Presentations from Participating Cities                            | <ul style="list-style-type: none"> <li>Quezon, Philippines [15 mins]</li> <li>Anji City, China [15 mins] <ul style="list-style-type: none"> <li>Anji City Urban Biodiversity Case Sharing</li> </ul> </li> </ul>  |
| 16:00-17:30<br>(90 mins) | Interactive Exercise: Using Data to Create a New Park in PerfectPlace City – Part 1 | <ul style="list-style-type: none"> <li>Split participants into diverse groups</li> <li>Section 1 [45 mins]: <ul style="list-style-type: none"> <li>Each group is given a priority urban issue: public access to parks, climate mitigation, water quality, etc.</li> <li>Groups discuss data priorities and develop indicators</li> <li>Groups present their indicators</li> </ul> </li> <li>Section 2 [45 mins]: <ul style="list-style-type: none"> <li>Groups discuss how to combine data layers to choose locations of new parks</li> <li>Groups analyze data and propose park locations</li> </ul> </li> </ul> |

# DAY 2 – Agenda / 第二天 - 议程

| TIME                     | SESSION TITLE  | DESCRIPTION  |
|--------------------------|--|--|
| 09:00-9:15<br>(15 mins)  | Day 2 Welcome  | <ul style="list-style-type: none"> <li>Welcome</li> <li>Overview of Day 2 agenda</li> </ul>  |
| 09:15-10:00<br>(45 mins) | City Spotlights:<br>Presentations from<br>Participating Cities                                 | <ul style="list-style-type: none"> <li>National Institute of Urban Affairs, India [15 mins] <ul style="list-style-type: none"> <li>On behalf of GEF-7 Indian cities</li> </ul> </li> <li>Melaka City, Malaysia [15 mins]</li> <li>Q&amp;A [15 mins]</li> </ul> |
| 10:00-10:45<br>(45 mins) | Interactive Exercise: Using<br>Data to Create a New Park<br>in a Hypothetical City –<br>Part 2 | <ul style="list-style-type: none"> <li>Groups present their proposed park locations</li> </ul>   |
| 10:45-11:15<br>(30 mins) |  | TEA BREAK  |
| 11:15-11:45<br>(30 mins) | Presentation: Nature as<br>Infrastructure  | <ul style="list-style-type: none"> <li>Conceptualizing nature as critical infrastructure and assigning value to the infrastructural services that nature provides in cities [20 mins]</li> <li>Q&amp;A [10 mins]</li> </ul>                                    |
| 11:45-12:15<br>(30 mins) | Presentation: Introduction<br>to the City Biodiversity<br>Index                                | <ul style="list-style-type: none"> <li>How to use the self-assessment tool to assess and monitor the progress of city-led biodiversity conservation efforts against pre-intervention baselines [20 mins]</li> <li>Q&amp;A [10 mins]</li> </ul>                 |
| 12:15-13:15<br>(60 mins) |  | LUNCH BREAK  |

# DAY 2 – Agenda, cont. / 第二天--议程，续

| TIME                     | SESSION TITLE  | DESCRIPTION  |
|--------------------------|--|--|
| 13:15-13:45<br>(30 mins) | Post-lunch Energizer   |  |
| 13:45-14:30<br>(45 mins) | Presentation: Cost-benefit Assessments for Nature-related Projects | <ul style="list-style-type: none"> <li>• Introduction to city-level cost-benefit assessments for nature (using nature as a proxy for biodiversity)</li> <li>• Illustrate the potential financial return on investment for nature-based projects in cities</li> <li>• Case study: Canal Restoration to Mitigate Flooding and Water Pollution in Kochi, India</li> </ul> |
| 14:30-15:00<br>(30 mins) | Case Study Presentation: Chengdu's Urban Green Heart program       | <ul style="list-style-type: none"> <li>• Introduction to the AIPH Green City Awards [10 mins]</li> <li>• Case study presentation: Chengdu's Urban Green Heart program [20 mins]</li> <li>• Q&amp;A [10 mins]</li> </ul>  |
| 15:00-15:30<br>(30 mins) | Presentation: Introduction to Natural Capital Valuation            | <ul style="list-style-type: none"> <li>• Overview of natural capital valuation and how to use it to estimate the financial value of nature's contributions and incorporate nature into city project design</li> <li>• Case study from an Asian city</li> <li>• Q&amp;A [10 mins]</li> </ul>  |
| 15:30-16:00<br>(30 mins) | TEA BREAK  |  |
| 16:00-17:00<br>(60 mins) | Interactive Exercise: Conduct Your Own Cost-benefit Assessment     | <ul style="list-style-type: none"> <li>• Split participants into diverse groups</li> <li>• Using provided scenarios, brainstorm and discuss costs and benefits</li> <li>• Report back in plenary</li> </ul>  |
| 17:00-17:15<br>(15 mins) | Day 2 Wrap Up & Preview of Day 3                                   | <ul style="list-style-type: none"> <li>• Preview of Day 3 agenda</li> <li>• Reminder about site visit</li> </ul>   |

# DAY 3 - Agenda / 第三天 - 议程

| TIME                     | SESSION TITLE  | DESCRIPTION   |
|--------------------------|--|---|
| 09:00-09:15<br>(15 mins) | Day 3 Welcome  | <ul style="list-style-type: none"> <li>Welcome</li> <li>Overview of Day 3 agenda</li> </ul>   |
| 09:15-10:00<br>(45 mins) | Presentation: Urban Biodiversity Finance Guide – Sources of Finance for Biodiversity                     | <ul style="list-style-type: none"> <li>Overview of different financing sources and resources for urban biodiversity projects in cities</li> <li>Showcase innovative mechanisms to finance urban biodiversity related projects</li> <li>Catalogue of financing and technical assistance opportunities for 2023 – 2024</li> <li>Biodiversity finance decision-making tree</li> <li>Q&amp;A [15 mins]</li> </ul> |
| 10:00-10:30<br>(30 mins) | Interactive Exercise: Using the Biodiversity Finance Decision Making Tree - Part 1                       | <ul style="list-style-type: none"> <li>Split participants into diverse groups</li> <li>Provide scenarios and ask the participants to identify the best financial pathways for the projects based on their characteristics and attributes</li> </ul>   |
| 10:30-11:00<br>(30 mins) | TEA BREAK  |   |
| 11:00-11:30<br>(30 mins) | Interactive Exercise: Using the Biodiversity Finance Decision Making Tree - Part 2                       | <ul style="list-style-type: none"> <li>Report back in plenary</li> </ul>  |
| 11:30-12:00<br>(30 mins) | Presentation: Technical Assistance Opportunities to Enhance Access to Finance for Biodiversity in Cities | <ul style="list-style-type: none"> <li>Overview of ICLEI's Transformative Actions Program (TAP) and case studies from Asian cities [10 mins]</li> <li>How to prepare a TAP application [10 mins]</li> <li>Q&amp;A [10 mins]</li> </ul>  |
| 12:00-12:30<br>(30 mins) | Wrap-up  | <ul style="list-style-type: none"> <li>Feedback survey</li> <li>Participants' reflections: What did you learn? What else do you want to know? How can we continue to help you?</li> </ul>   |

# MEET THE TRAINERS / 会见培训师

**John-Rob Pool**  
Senior Manager,  
UrbanShift, WRI

**Dr. Ted Wong**  
Research and Project Associate,  
Data & Tools,  
WRI

**Dr. Elizabeth Wesley**  
Data Scientist,  
Urban Surfaces and  
Extreme Heat,  
WRI

# RULES OF ENGAGEMENT / 交战规则

Participate  
actively

Moderators will  
give the  
opportunity to  
everyone in the  
room to  
contribute

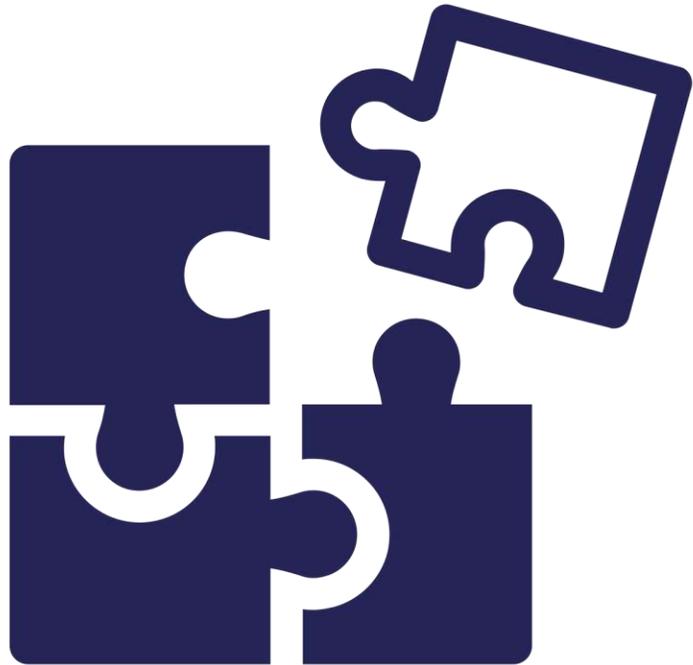

Keep distraction  
to a minimum

积极参与

主持人将为在座各位提供发表意见的机会

尽量减少干扰

# IMPORTANT: THANK YOU FOR BRINGING YOUR EXPERTISE / 重要：感谢您带来的专业知识

We know that some of you are already experts in biodiversity.

我们知道，你们当中有些人已经是生物多样性方面的专家。

Some of you are experts in the social and political dimensions of urban planning and practice.

你们中有些人是城市规划和实践的社会和政治方面的专家。

There will be gaps in the information we present. Please share your expertise and help us create a complete picture.

我们提供的信息可能会有遗漏。请分享您的专业知识，帮助我们绘制一幅完整的图画。

# Participant Introductions / 与会者介绍

REPORT

# Better Forests, Better Cities

Authors: Sarah Jane Wilson, John Jans, John Hah-Park, Eddie Fay, Mark Phillips, Scott Robinson, and Douglas McCallum

Contributors: Greg Thomson, Katherine Wolf, Katherine Lord, Paige Langer, Tom Strick, Catherine River Wilson, Lee Eyles, James Anderson, Luke Wardle, Todd Barnes, and Suzanne Owen

## NINE THINGS CITIES NEED TO KNOW ABOUT BIODIVERSITY

- 1 **BIODIVERSE FORESTS PROVIDE MORE GOODS AND SERVICES TO CITIES**
- 2 **BIODIVERSE FORESTS STORE MORE CARBON, MORE RELIABLY**
- 3 **BIODIVERSE, INTACT FORESTS PROTECT WATERSHEDS**
- 4 **FOREST BIODIVERSITY PROVIDES A TEMPLATE FOR NEW MEDICINES AND PHARMACEUTICALS**
- 5 **BIODIVERSE FORESTS SUPPORT THE WORLD'S POLLINATORS--AND URBAN FOOD SUPPLIES**
- 6 **PROTECTING BIODIVERSE FORESTS CAN REDUCE RISK OF DISEASES AND PANDEMICS**
- 7 **ACCESS TO BIODIVERSITY IN URBAN AREAS BENEFITS PHYSICAL AND MENTAL HEALTH**
- 8 **URBAN FORESTS CAN SUPPORT BIODIVERSITY**
- 8 **TROPICAL FORESTS HOLD THE VAST MAJORITY OF EARTH'S TERRESTRIAL BIODIVERSITY**

An aerial photograph showing a city skyline in the background, partially obscured by a dense, green forest. A winding river flows through the forest, reflecting the sky and surrounding trees. The overall scene is a blend of urban development and natural environment.

**1. Biodiverse ecosystems  
provide more goods and  
services to cities /**

**生物多样性生态系统为城市提供  
更多商品和服务**

A photograph of a bison standing in a field of tall, dry grass. In the background, a city skyline is visible under a cloudy sky, with mountains in the distance. The text is overlaid on the image.

**2. Biodiverse ecosystems  
store more carbon, more  
reliably /**

**生物多样性生态系统能更可靠地  
储存更多的碳**

**3. Biodiverse, intact  
ecosystems protect  
watersheds /**

**完整的生物多样性生态系统保护  
流域**

**4. Biodiversity in the world's ecosystems provide the blueprints for new medicines and pharmaceuticals /**

**世界生态系统的生物多样性为新药和制药提供了蓝图**

**5. Biodiverse ecosystems support the world's pollinators—and therefore urban food supplies /**

**生物多样性生态系统支持着全世界的授粉者，因此也支持着城市的食物供应**

A fox with reddish-brown fur and pointed ears is looking directly at the camera. It is surrounded by lush green plants and some purple flowers. The background shows a blurred building with windows.

**6. Protecting natural ecosystems  
can reduce risks of zoonotic and  
vector-borne diseases and  
pandemics /**

**保护自然生态系统可降低人畜共患病、  
病媒传染病和大流行病的风险**

A giraffe is shown in the foreground, looking towards the right. The background features a lush green savanna with scattered trees and a hazy city skyline under a clear blue sky. The text is overlaid on the image in a bold, yellow font.

**7. Access to biodiverse nature  
in urban areas provides  
measurable benefits to urban  
residents /**

**在城市地区接触生物多样性的大自然  
可为城市居民带来可衡量的益处**

A photograph of a deer standing in a forest at night. The scene is illuminated by long, colorful light trails (red, orange, yellow, green) that create a sense of motion and depth. The deer is positioned in the center-right of the frame, looking towards the left. The background is dark, with some faint lights visible in the distance.

**8. Urban forests can house  
high biodiversity /  
城市森林可以容纳高度的生物多  
样性**

**9. Tropical forests hold the majority of Earth's terrestrial biodiversity and are therefore essential to urban well-being and sustainability /**

**热带森林拥有地球上大部分陆地生物多样性，因此对城市福祉和可持续性至关重要**

**URBAN  
SH/FT**

# **INGRID'S SLIDES**

Driven Urban Biodiversity  
Strategy – Part 1**

**如何制定数据驱动  
型城市生物多样性  
战略--第一部分**

# Topics

# 主题

**1. Goals and indicators**

**2. Data sources**

**3. Data collection**

**1. 目标和指标**

**2. 数据来源**

**3. 数据收集**

# Elements of a biodiversity strategy /

# 生物多样性战略的要素

## Actions

Specific things the city does or plans to do.

## 行动

城市所做或计划做的具体事情

## Inputs

Resources and conditions necessary to implement the actions

## 投入

实施行动所需的资源和条件

## Outputs

Concrete, nonquantifiable measures of success, such as deliverables and events.

## 产出

具体的、不可量化的成功衡量标准，如交付成果和活动

## Indicators

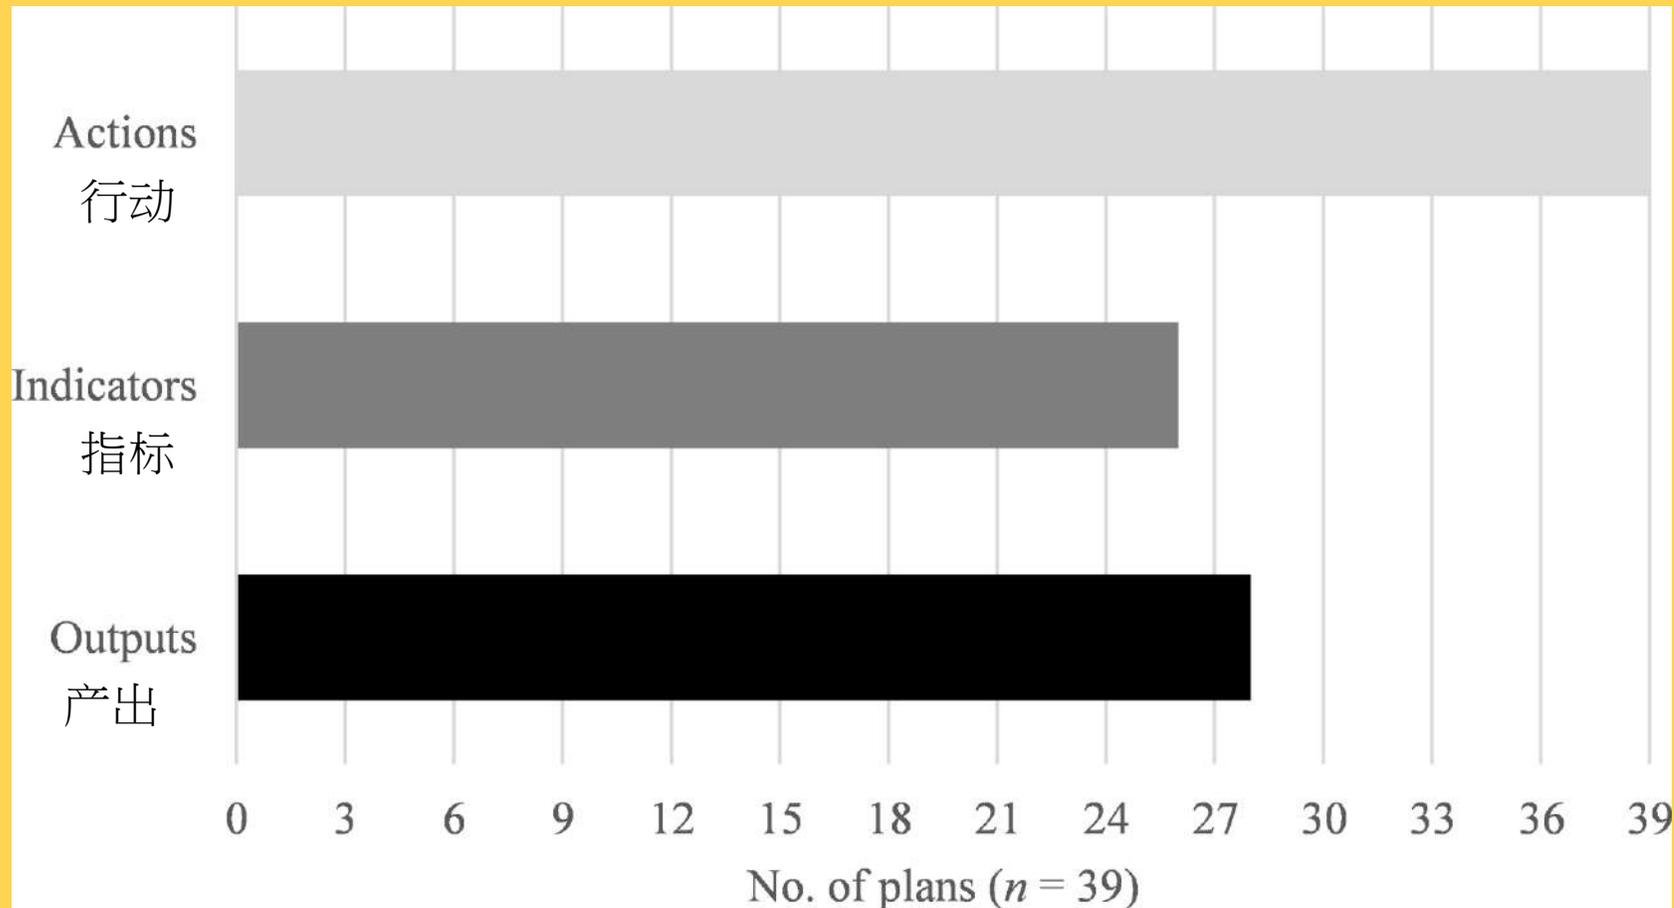

Quantifiable measures based on data.  
Convey information about progress toward goals.

## 指标

基于数据的可量化衡量标准。传递有关目标进展情况的信息

# Many plans are incomplete

## 许多计划不完整

**What do city biodiversity plans typically include?**

城市生物多样性计划通常包括哪些内容？

# How the strategy elements fit together

## 战略要素如何相互配合

**GOAL** *Increase bird diversity*

Indic.

目标  
增加鸟类多样性

**ACTION**

*Restore riparian habitat*

Indic.

行动  
恢复河岸栖息地

**INPUT**

*Money and staff time*

Indicator

输入  
资金和员工时间

**OUTPUT**

*Invasive plant removal project*

Indicator

产出  
入侵植物清除项目

# What indicators?

# 有哪些指标？

Money and staff time

资金和员工时间

Program to remove  
invasive plants

入侵植物清除项目

Restore riparian  
habitat

恢复河岸栖息地

Increase bird  
diversity

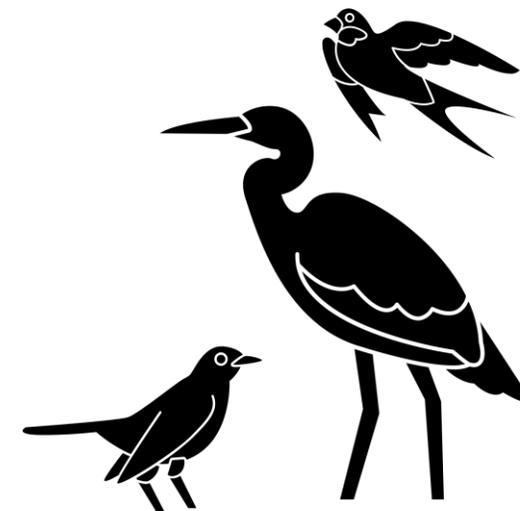

增加鸟类多样性

*These probably require baseline and  
follow-up*

这些指标可能需要基准线和后续跟踪

# Indicators can point to failure points

# 指标可以指出失败点

# What makes a good indicator?

# 什么是好的指标？

**Relevant**

相关性

**Specific**

具体

**Calculable**

可计算

**Interpretable**

可解释

**Replicable**

可复制

# Are these good indicators?

# 这些指标好吗？

Which of these indicators might be good for assessing the effectiveness of a wetland restoration program?

在这些指标中，哪些指标可用于评估湿地恢复计划的有效性？

Ecosystem health

生态系统健康

Money spent on restoration

用于恢复的资

Area of wetlands

湿地面积

Number of microbial species

微生物物种数量

Population of the city

城市人口

# Urban biodiversity assessment frameworks

### Singapore Index on Cities' Biodiversity (SICB)

# An example indicator

# 指标示例

## 5.2 Access to Nature

|  |   |  |  |
|--|---|--|--|
| <b>Intent</b>  | Measure increasing access to natural areas for all members of vulnerable urban communities.   |  |  |
| <b>Instructions</b>  | Complete the advanced or basic indicator as follows:<br><br><table border="1"><tr><td><b>Basic:</b><br/>Calculate the percentage of residents living within a walkable distance (300 metres) of a public, open access natural area.</td><td><b>Advanced:</b><br/>Calculate the percentage of residents in the lowest income quintile (lowest 20%) living within a walkable distance (300 metres) of a public, open access natural area.</td></tr></table> | <b>Basic:</b><br>Calculate the percentage of residents living within a walkable distance (300 metres) of a public, open access natural area. | <b>Advanced:</b><br>Calculate the percentage of residents in the lowest income quintile (lowest 20%) living within a walkable distance (300 metres) of a public, open access natural area. |
| <b>Basic:</b><br>Calculate the percentage of residents living within a walkable distance (300 metres) of a public, open access natural area. | <b>Advanced:</b><br>Calculate the percentage of residents in the lowest income quintile (lowest 20%) living within a walkable distance (300 metres) of a public, open access natural area.  |  |  |
| <b>Alternatives</b>  | Complete <a href="#">Singapore Index indicator 13</a> (based on the 2021 version).  |  |  |
| <b>Resources</b>   | None  |  |  |
| <b>Scoring</b>   | Score this indicator as follows:<br><br><ul style="list-style-type: none"><li>++ Multi-year positive trend established</li><li>+ Positive trend observed</li><li>• Baseline measured, trend undetermined</li><li>- Negative trend observed</li><li>-- Data not available</li></ul>  |  |  |

Percent of residents within 300 m of a public natural area

### INDICATOR 13

#### HEALTH AND WELLBEING – PROXIMITY/ ACCESSIBILITY TO PARKS

##### HOW TO CALCULATE INDICATORS

(1.3A) Proximity is measured in terms of the proportion of the households living within 400m from a park or green space.

Straight line distances are used to determine whether households fall within 400m from a park or green space. Details and illustrations on how this indicator may be calculated can be found in [Annex F](#).

$(\text{Population of city living within 400m from a park/green space}) \div (\text{Total population of city}) \times 100\%$

OR

(1.3B) Accessibility is measured in terms of the proportion of the population living within walking distance (400m) from a park or green space. This distance takes into account obstacles and routes within the street network system, differing from the calculation of proximity. Details and illustrations on how this indicator may be calculated are appended below.

Spatial analysis software such as ArcGIS will be helpful to calculate this indicator.

$(\text{Population of city living within walking distance (400m) from a park/green space}) \div (\text{Total population of city}) \times 100\%$

##### WHERE TO GET DATA FOR CALCULATIONS

Types of data include GIS software, satellite imagery, and maps of land use.

##### BASIS OF SCORING

The city is to score itself using either criteria (1.3A) or (1.3B), depending on data availability.

Some cities have used the highest score of 90-100% as their planning target.

Scoring range for (1.3A)

0 POINTS: < 30.0%

1 POINT: 30.0 – 49.9%

2 POINTS: 50.0 – 69.9%

3 POINTS: 70.0 – 89.9%

4 POINTS: 90.0 – 100.0%

Cities are encouraged to use (1.3B) for this indicator as residents' accessibility to parks will provide a more accurate measure of parks that are available to residents.

Scoring range for (1.3B)

0 POINTS: < 46.1%

1 POINT: 46.1 – 55.7%

2 POINTS: 55.8 – 64.8%

3 POINTS: 64.9 – 72.0%

4 POINTS: > 72.0%

公共自然区域 300 米范围内居民的百分比

# Local or global data?

# 本地数据还是全球数据？

high spatial resolution  
高空间分辨率

alignment with local priorities  
符合当地优先事项

benefit from existing administrative structures  
受益于现有的行政结构

often ready for analysis  
通常可用于分析

high accuracy  
精确度高

difficult to compare with other cities  
难以与其他城市比较

moderate spatial resolution  
中等空间分辨率

alignment with global frameworks  
与全球框架一致

subject to technical constraints  
受技术限制

might require pre-analysis processing  
可能需要预先分析处理

moderate precision  
中等精度

designed for global comparisons  
专为全球比较而设计

**GLOBAL**  
全球

**LOCAL**  
本地

# Community-based ecosystem monitoring

## 基于社区的生态系统监测

### Science-society interface 科学与社会的互动

 Danielsen F, et al. 2022  
*Annu. Rev. Environ. Resour.* 47:637-70

# Citizen science

# 公共科学

- **Data collected without specific scientific goal in mind**
- **Protocols and data-management structures designed by scientists**
- **Accuracy varies**

- 在没有特定科学目标的情况下收集数据
- 由科学家设计的协议和数据管理结构
- 准确性不同

# Community-based ecosystem monitoring

## 基于社区的生态系统监测

- **Goals defined by community and scientists in collaboration**
- **Data collection and management processes designed by community with scientists' advice**
- **Data quality is generally good**

Danielsen F, et al. 2022.  
*Annu. Rev. Environ. Resour.* 47:637-70

- 由社区和科学家合作确定目标
- 社区根据科学家的建议设计数据收集和管理流程
- 数据质量总体良好

# Benefits of participatory data collection

## 参与式数据收集的优势

- **Low cost**
  - **Public education**
  - **Public empowerment**
  - **Favorable publicity for projects**
- 成本低
  - 公众教育
  - 增强公众能力
  - 有利于项目的宣传

*The main drawback is that data accuracy can be lower than data from an all-professional data-collection effort. This is why careful process design is important. For example, many CS projects use custom smartphone apps to ensure complete data entries.*

*主要缺点是数据准确性可能低于全专业数据收集工作的数据。因此，精心设计流程非常重要。例如，许多CS项目使用定制的智能手机应用程序来确保完整的数据输入。*

# Your experiences

# 你的经历

## OPEN DATA PHILIPPINES

The **Open Data Philippines (ODPH) Portal** is an online repository of open data resources and datasets from government agencies. This portal addresses the constitutional right of Filipinos to data as part of a government initiative to promote transparent, participatory, inclusive, and accountable governance. ODPH is also a commitment to the Open Government Partnership.

# Elements of data sharing agreements

## 数据共享协议的要素

- **Intended uses and prohibited uses**
  - **Time period of the agreement**
  - **Data description**
    - Time period
    - Spatial extent
    - Resolution
    - Data fields
    - Format and transmission method
  - **Update and support considerations**
  - **Requirements for storing and managing the data**
  - **Acknowledgment requirements**
- 预期用途和禁止用途
  - 协议期限
  - 数据说明
    - 时间段
    - 空间范围
    - 分辨率
    - 数据字段
    - 格式和传输方法
  - 更新和支持方面的考虑
  - 存储和管理数据的要求
  - 确认要求

# Standardization

# 数据标准化

- **Quality standards**
- **Metadata requirements**
- **Standard procedures**
- **质量标准**
- **元数据要求**
- **标准程序**

# Organization-wide scope

# 组织范围

- When these standard processes apply to all data producers and data holders in an organization, data integrity and responsibility become woven into the organization's culture.
- If the governing body's authority comes from the Mayor, then its scope can encompass the entire government: fleet management, tax department, police.
- 当这些标准流程适用于组织中的所有数据生产者和数据持有者时，数据完整性和责任就会融入组织的文化中。
- 如果管理机构的权力来自市长，那么其范围就可以涵盖整个政府：车队管理、税务部门、警察局。

## OPEN DATA INITIATIVES...

- Promote innovation among data users
- Enforce good data practices among data holders
- Reduce data management costs  
embody government transparency

## 开放数据计划...

- 促进数据用户的创新
- 在数据持有者中推行良好的数据实践
- 降低数据管理成本 体现政府透明度

# Technology and people

# 技术与人员

## Data governance is not just about computers. It's also about...

- Relationships between departments
- Adoption of behaviors
- Skill development
- Conflict resolution
- Goal-setting and strategic planning

Don't let the IT department run the whole thing!

数据管理不仅与计算机有关。它还涉及

- 部门之间的关系
- 行为的采用
- 技能开发
- 解决冲突
- 目标设定和战略规划

不要让信息技术部门包办一切!
